Grade Levels:

Enter rubric title			
	Poor 1 pts	Fair 2 pts	Good 3 pts
Research - Background	Poor Generally confusing or incomplete explanations of where the energy comes from, how it works and how it is renewed.	Fair Some errors in explanation of the energy source, but generally clear. Mostly complete descriptions of where the energy comes from, how it works and how it is renewed.	Good Clearly explains the background for your energy source with no errors. Includes where the energy comes from, how it works and how it is renewed.
Research - Pros and Cons	Poor Pros and cons are not clearly explained. Only 1 example included.	Fair Pros and cons are given but explanations are not adequate. 1-2 examples are given for each.	Good Clearly explains the pros and cons of your assigned energy source. 2-3 examples for each are included.
Presentation	Poor Pictures, fonts, colors and transitions distract the viewer and do not add anything to the presentation.	Fair Presentation is organized. Pictures, fonts, colors and transitions do not always help the viewer understand the topic.	Good Care was obviously taken to ensure your presentation is easy to read and understand. Pictures and graphics are included to help explain your topic. Fonts, colors and slide transitions are appropriate and help the viewer understand the content.
Participation (graded individually)	Poor Some group members did nothing to contribute.	Fair All group members participate but contributions are not equal. Ex: one group member looked for pictures but did nothing else.	Good All group members made significant contributions to the presentation, including research and creating the presentation.
